

Influenza

SURVEILLANCE REPORT

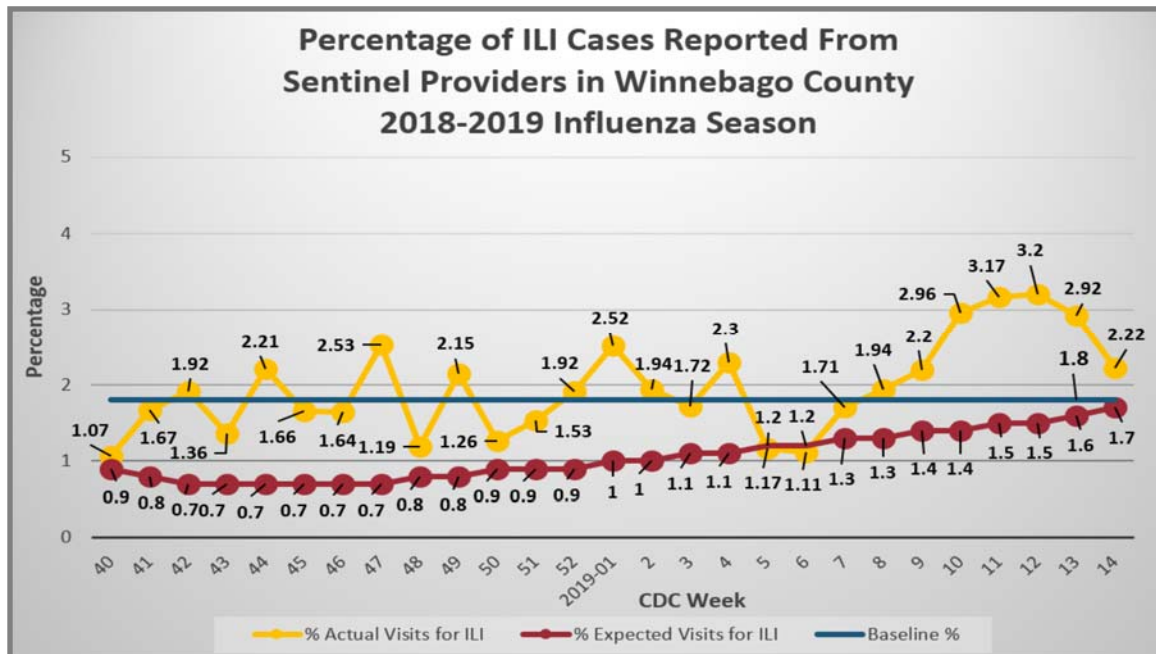

CDC Week 14: Week Ending Saturday, April 6, 2018

Vaccination is the best way to protect against influenza infection.
 All Winnebago County residents aged six months and older should be vaccinated annually.

Weekly Influenza Activity Summary: This week's surveillance activities shows **169** cases of influenza in Winnebago County as detailed in this report. Influenza surveillance for the County involves the weekly collection of data from our partners including hospitals, physicians, clinics, long term care (LTC) facilities and laboratories. Thank you to all of the surveillance partners for their help in collecting this information.

Age Range	Influenza A	Influenza B	Influenza A&B
0-4	56	3	0
5-17	36	3	1
18-64	47	7	0
65+	12	4	0
TOTALS	151	17	1

← Figure 1: Illustrates the percentage of emergency department visits with a complaint of ILI reported during the surveillance week compared to the expected percentage and the baseline percentage for ILI. ILI "Influenza like Illness" is defined as fever $\geq 100^{\circ}\text{F}$ and cough and/or sore throat.

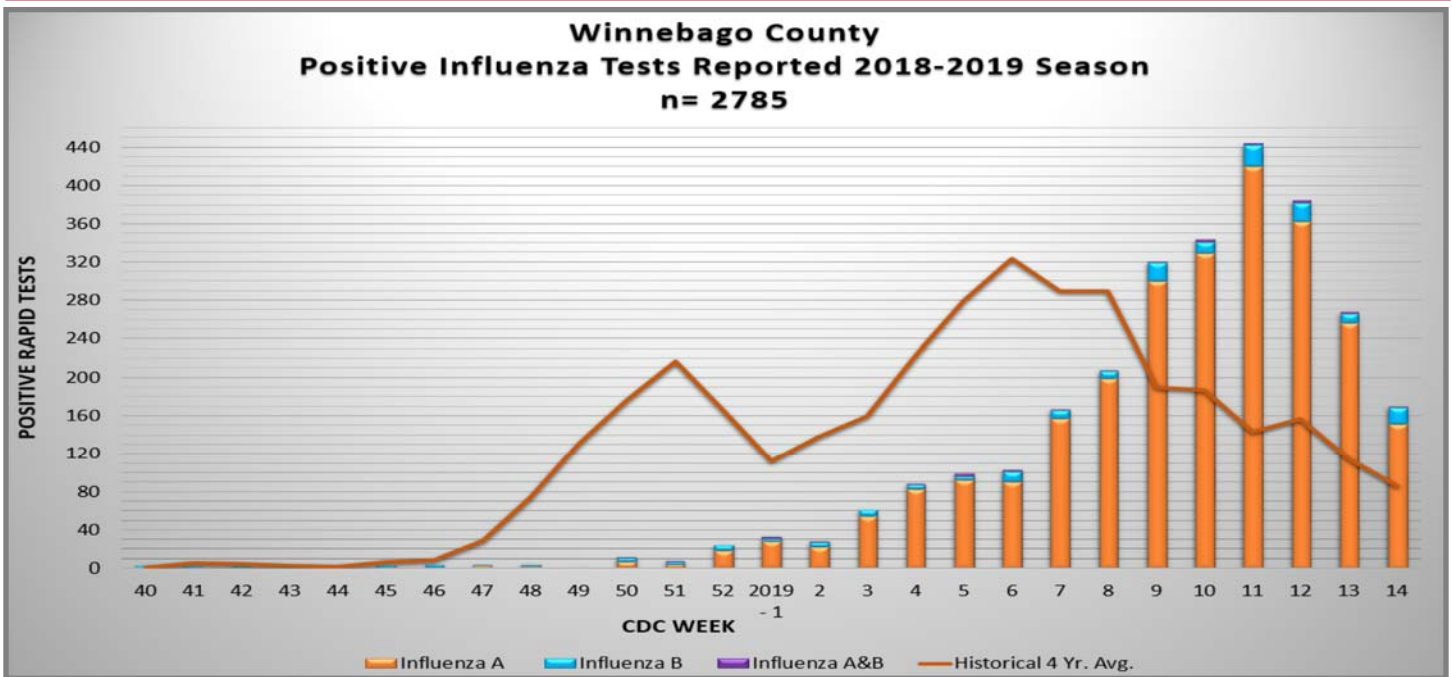

Influenza ICU Admissions & Historical Surveillance Data

Influenza-associated Intensive Care Unit (ICU) Admissions:

← Figure 2: Illustrates the total number of ICU admissions reported during the current Influenza Surveillance Period.

↓ Figure 3: Illustrates the total number of flu cases reported during the current influenza surveillance period. The four year historical average for the County is noted by the orange line on the graph.

Practice and promote the three C's in helping prevent the spread of influenza in our community:

- CLEAN** - Wash your hands
- COVER** - Cover your cough and sneeze
- CONTAIN** - Contain your germs, stay home if you are sick

Long Term Care Outbreaks & Influenza Geographic Surveillance Data

Influenza Outbreak Activity in Long Term Care Facilities: The Health Department uses surveillance data to monitor influenza outbreaks in long term care facilities as part of the community's current activity with influenza. An outbreak is defined as two or more cases of ILI occurring within 72 hours among residents of a facility.

No outbreaks were reported during week 14.

Geographic Breakdown of Positive Influenza Tests in the County: The Health Department uses surveillance data to monitor positive influenza tests throughout the County by ZIP codes.

Total Number of Influenza Cases for The Reporting Week by Zip Code			
Zip Code	Influenza A	Influenza B	Influenza A&B
61016	4	0	0
61024	3	0	0
61063	1	0	0
61072	3	0	0
61073	10	0	0
61080	0	1	0
61088	4	0	0
61101	12	2	0
61102	9	1	0
61103	17	2	0
61104	13	0	0
61107	18	2	0
61108	15	4	0
61109	14	1	1
61111	12	2	0
61114	6	0	0
61115	10	2	0
Totals for the Week	151	17	1

Influenza Like Illness¹ (ILI) Reported on a State Level and National Influenza Activity

Sentinel Provider Reports

Percent of ILI Reported From Sentinel Providers by Region, Illinois, 2018-2019

Table 1 ↓: Illustrates the actual number of emergency department visits with a complaint of ILI reported during each surveillance week compared to the expected number of ILI complaints.

Actual Number of ILI Cases Reported in Winnebago County 2018-2019 Influenza Season

CDC Week	Actual Number	Expected Number
9	57	20.6
10	76	21.9
11	88	23.4
12	79	25.2
13	68	27.8
14	51	30.6
SEASON TOTAL	1010	479
