## SURVEILLANCE REPORT

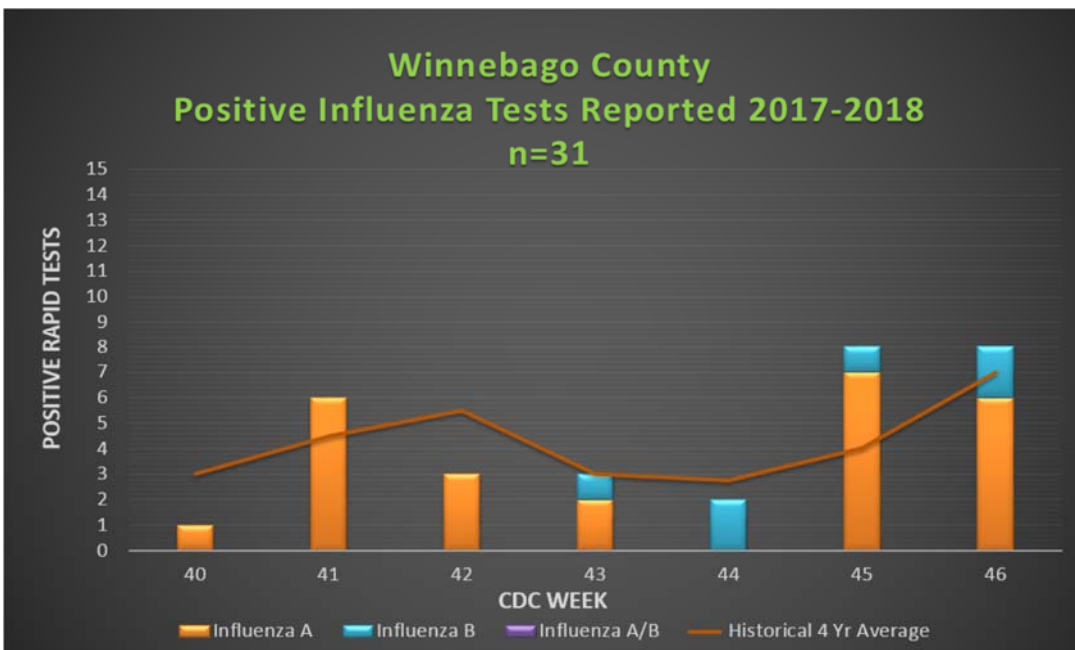

### CDC Week 46: Week Ending Saturday, November 18, 2017

Vaccination is the best way to protect against influenza infection.  
 All Winnebago County residents aged six months and older should be vaccinated annually.

**Weekly Influenza Activity Summary:** This week’s surveillance activities identified eight (8) cases of influenza in the County as detailed in this report. Influenza surveillance for Winnebago County involves the weekly collection of data from surveillance partners including hospitals, physicians, clinics, long term care (LTC) facilities and laboratories. Thank you to all of the surveillance partners for their help in collecting this information.
