

**Weekly Influenza Surveillance Report
CDC Week 17 April 21st—27th, 2013**

In Brief:

Mortality

Confirmed deaths from Pneumonia Week 17: **4**

Percent of deaths due to Pneumonia Week 17: **10.25%**

Influenza-Like Illness Surveillance

Sentinel Site ILI rate -Week 17 Ending April 27th: **0.0%**

Pneumonia Hospital Admissions

Week 17 Ending April 27th: **10**

Previous Week 16 Ending April 20th: **30**

Note: Numbers include 2 hospitals and are one week behind due to reporting methods.

Figure 1 displays the current number of rapid flu cases reported to WCHD and broken down by influenza sub-typing compared to a 4-year historical average (the red line). The average is elevated due to the inclusion of H1N1 data from 2009. 4,056 total positive rapid flu cases have been reported for the 2012-2013 flu season. 26 cases of influenza have been reported for week 17.

Figure 2 displays the weekly percentage of Influenza-Like Illness (ILI) as identified by the Essence Syndromic Surveillance System. The blue line shows the percentage of ILI Emergency Department visits in Winnebago County from our two participating hospitals. The red line shows the regional ILI percentage for counties participating in Essence. This graph displays the most current Essence data, which is through CDC Week . The last week shown is preliminary data depending on how much data is available for the week. ILI for CDC Week 19 for Winnebago County is 0.0%, compared with Regional ILI at .65% .

Figure 3 is the representation of visits from our sentinel sites not participating in Essence for ILI. ILI activity among the two sites reporting for CDC Week 17 was: 0.0%

Figure 4 compares the current number of pneumonia hospital admissions (red line) against the 4-year historical average (the green line). For CDC Week 17, we have 10 total hospital admittances reported. Note that all data are preliminary and numbers for weeks 15, 16, and 17 are still arriving.

Outside the County:

Regional Influenza Activity (as of Week 17)

During week 17, the following influenza activity was reported:

- Puerto Rico and 3 states reported regional influenza activity (Connecticut, New Hampshire, and New York).
- Local influenza activity was reported by 6 states (Alaska, Arizona, Massachusetts, New Jersey, Ohio, and Pennsylvania).
- The District of Columbia, Guam, and 36 states reported sporadic influenza activity (Alabama, Arkansas, California, Colorado, Delaware, Florida, Hawaii, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming).
- Five states (Georgia, Idaho, Kansas, Mississippi, and Utah) reported no influenza activity.
- The U.S. Virgin Islands did not report.
